

CBN ELECTROPLATED TOOLS FOR THE SPRING INDUSTRY

MUZZI is one of the global leaders in designing and manufacturing electroplated diamond and CBN tools, bringing innovation to technological partners in key industries.

The use of CBN (Cubic Boron Nitride) in spring-end grinding is steadily expanding and **MUZZI** is at the forefront.

Our decades of expertise ensure unmatched quality, precision, and durability.

CBN BLAU : ADDED VALUE IN SPRING GRINDING

To meet the evolving demands of our customers, we've developed CBN BLAU, an advanced, cost-effective abrasive mixture designed for superior performance:

CONTROLLED CBN DENSITY

for consistent results

EFFICIENT USE

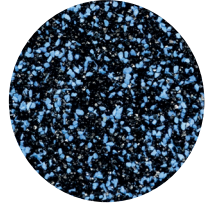

of superabrasive crystals, maximizing tool life

ENHANCED MATERIAL REMOVAL

reducing clogging of the abrasive surface

B427 AND B601 GRIT SIZES

available for versatile applications

CBN BLAU CRYSTALS
DETAIL

SPHERICAL TOOLS FOR BURRS REMOVAL

Our extended range of shank spherical tools is engineered to effortlessly remove burrs generated during spring surface grinding.

Designed for optimal performance and value, these tools ensure a smooth, high-quality finish every time.

CUSTOM SOLUTIONS FOR YOUR UNIQUE NEEDS

At MUZZI, we understand that every production challenge is different. That's why we offer tailor-made tools, developed to meet your specific requirements.

With 50 years of experience and unmatched technical expertise, we're here to support your success.
